# eHouseKeep

eHouseKeep

housekeeping management

mobile technology for tourism

eHouseKeep

Optimize the housekeeping operations of your hotel through mobile technology.

advantages

Some business benefits eHouseKeep offers you:

- Reduce the response time and improve the workflow between hotel areas: front desk, housekeeping and maintenance service.
- Improve the quality of customer service. Each employee has its task check-listed in a cloud-connected mobile device.
- Control times, progress against their schedule and every staff member location for effortless supervision.
- NFC technology for user access and room identification.
- Each mobile device can work offline with automatic data synchronization when it gets online.

integration

This software service works fully integrated with:

- Every PMS with standard interface
- Other software services as eTechAssist and eHotelGuest
- Other third-party software services through standard interface

features

These are some eHoseKeep main features:

- Staff Management & Task Planning
- In-House Services & Frecuency Setup
- Special Guest Requirements Management
- Minibar Consumption & Posting
- Room & Hotel Common Areas Cleaning Status
- Out of Service Room Management
- Work Orders Registration
- Task Timming Control
- Room Employee Access & Location Control
- Intuitively designed for any user ability
- Multi-lingual

platforms

eBellCaptain is available for multiple platforms.

It is certain that the hospitality industry works when we work but it also works when we rest, when we travel or when we sleep. The hospitality industry always works.

The support and customer service cannot stop and, that's why, we offer our help **every day** of the year, **24** hours.
